

Greetings from Snowflake Animal Rescue!

December 2024

We hope this finds you well.

Emmy is a feral cat taking care of her 3 young kittens. It was immediately apparent that she was in trouble. She hobbled around on 3 legs, unable to use her left front leg, and her 2 front paws were scraped and badly infected. A trip to the vet also revealed an old injury—a broken hind leg. After months of antibiotics and treatments her front paws are healed, though she still doesn't use her left paw. Her hind leg doesn't appear to cause pain or mobility issues. The life of a feral cat is not easy. Emmy would not fare well outdoors so she is now a Snowflake Angel and will live safely indoors.

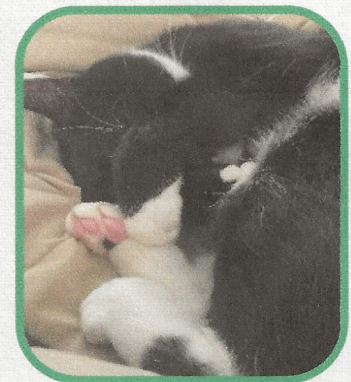

A feral cat is not socialized to people. Trap-Neuter-Vaccinate-Return (TNVR) is a humane and effective approach for stray and feral cats. It stops the breeding cycle and improves the lives of these cats. Please visit our website for more information on community and feral cats.

Oliver was abandoned after his family moved. He was a little rough around the edges as he had been homeless for a while. With the patience and dedication of his foster mom he turned into a dashing gentleman. He is now happy in his new home.

Oliver's Day

Woke up, had breakfast, batted a few balls around, played with the laser light, took a full bath and now time for a nap before lunch. Soooooo exhausting.

Our mission is to give stray and abandoned animals 'The Life of Oliver'. We assist them on their journey from fear, anxiety, hunger and illness to trust, happiness, health and contentment and finally to providing friendship, companionship and entertainment to their new forever home. We accomplish this with your generous support. Please consider a tax-deductible donation. 100% goes to reduce the suffering and overpopulation and improve the quality of life of many animals.

We wish you a wonderful Holiday season and a Happy New Year!
